

Jamil Soucar – Project Manager

Mr. Jamil Soucar has over 30 years of construction experience, with a focus on K-12 education facilities. He has managed school projects, new construction and modernization as a Project Manager for General Contractors as well as served as an Owner's Representative. He has managed school projects from the nascent stage of planning through the pre-construction phase up to construction completion.

As a Senior Project Manager and Owner's Consultant, he has overseen construction completion on 123 campuses and served as the liaison between Owner, Architect, subcontractors and other key players to develop project master scopes and budgets. He has managed the design and DSA approval process and acted as a key player in the value engineering and constructability review process.

Overseeing management of the project development from initiation to closure, his responsibilities include tending to all punch list work after substantial completion of the project and the daily site and administrative activities to ensure timely and budget conscious completion.
